

Summary:

Applicant: Magyar Korfball Szövetség/Hungarian Korfball Association

Seat: Szentedre, HU

Project ID #/Title: **22030178**, Sport FUNdamentals for all children

I. APPLICANT

Magyar Korfball Szövetség

Organization name (English):	Hungarian Korfball Association
Address:	Halász utca 1., Szentedre, 2000, Hungary
Statutory representative:	Bóné Zoltán
ID No. of organization:	19127684-1-13
Registered VAT Payer:	no
VAT Compensation:	no
Phone:	+36205821847
E-mail:	Tamas.Csonka@korfball.hu
URL:	korfball.hu

Coordinator of the project: Csonka Tamás
Coordinator's e-mail: Tamas.Csonka@korfball.hu
Coordinator's phone: +36702152073
Applicant heard about the current call from: <https://www.visegradfund.org/>, <http://www.nvesz.hu/> - Nemzeti Versenysport Szövetség,
Consultation: no
Previous projects: 21640204 ID. - Sport for all children / Participation

II. PROJECT PARTNERS

Partner No. 1	
Name of the organization in its native language: Český korfbalový svaz z.s.	
Name of the organization in English: Czech korfball association	
Address: Zátokova 100/2, Praha, 16017, Czech Republic	Czech Republic
Statutory representative: Ing. Daniel Valeš	Organization ID No.: 45245363
Registered VAT payer: no	VAT Compensation: no
Phone: +420 702 202 389	
E-mail: info@korfball.cz	Website: www.korfball.cz

Justification of involvement: The Czech korfbal association has experience in the school korfbal program, which is the basic of their system. In the past the Hungarian Korfbal Association has cooperated with them in a Visegrad Fund grant, it was named "Sport for all children" project in 2017. We would like to build in their experience into the program.

Partner No. 2

Name of the organization in its native language: Slovenská asociácia korfbalu

Name of the organization in English: Slovak Association of Korfbal

Address: Makovického 6/2, Prievidza, 97101, Slovakia

Slovakia

Statutory representative: Mgr. Martin Sonoga

Organization ID No.: 31940668

Registered VAT payer: no

VAT Compensation: no

Phone: +421911361044

E-mail: martinsonoga@gmail.com

Website: www.korfbal.sk

Justification of involvement: The Slovak Association of Korfbal has been selected as a partner, because the two federations have already been working together for years. The best Slovakian teams, and the Slovakian National team also participate in the Hungarian Championships. Both associations have been part of the "Sport for all children" project in 2017, granted by the Visegrad Fund. We think that the program helps for both country and federations to develop the region together through sport.

Partner No. 3

Name of the organization in its native language: POLSKI ZWIĄZEK KORFBALLU

Name of the organization in English: Polish Federation of Korfbal

Address: ul. BAGATELA, nr 10, lok. 10, Warszawa, 00-585,

Poland

Poland	
Statutory representative: PIOTR EUGENIUSZ URBAŃSKI	Organization ID No.: 146096030
Registered VAT payer: no	VAT Compensation: no
Phone: +48223001496	
E-mail: pzkorf@korfball.pl	Website: www.korfball.pl
Justification of involvement: We have selected the Polish Federation of Korfball as a partner, because we would like to build better relationships between the two federations than we have now. The two federations were participated together in the "Sport for all children" project in 2017, a loose connection has been made there, we think both of the federations can make profit from this relationship in korfball.	

III. PROJECT

1. PROJECT SUMMARY

1.1 Project title: Sport FUNDamentals for all children

1.2 Focus area/objective: Education and Capacity Building, Increase in the volume of common formal, informal and non-formal educational tools and teacher training opportunities

Is the project CBC? Cross-border filter

IMPLEMENTATION PERIOD: 01/03/2021–19/09/2021

2. PROJECT RELEVANCE AND CONTEXT

2.1 What is the main issue that your project would like to focus on? What is the current situation that you wish to change?

The main intent is to involve new teachers and new institutes (primary and secondary schools) into the world of Korfball, to show them how this sport can help to build a better and healthier society. Today Korfball is an upcoming sport in the V4 region. With the project we would like to emphasize the Korfball, and bring out its positive effects on the society. We can say, that this sport has his unique rules. There are many mixed gender sports in the world, but this is the only one, where equality is on the line. That is the reason why this could be the best way to promote health, as a mental-social-physical state of wellness. All of the participating countries have only a few people (trainers), who are interested in the theory and practise of korfball-teaching. These people usually do Korfball, because they like it. It's sad that in Hungary, there aren't any people who can make a living as a Korfball trainer. To do something in a proper way, you need to focus on it. But if people / the crowd have/has no intention in your work, there won't be enough progression in creating a healthier, sportier society, which Korfball could develope. We need to show the children and the schools what korfball is, and what it can give us to create a better world, to live in a better and healthier society.

2.2 What should be done to address this issue/problem? How does your project contribute to the solution?

Our aim with the project is to improve education, educational partnership, and competition between the Participants through a special event. It is important for us, to help the development of Korfball in the region by involving new teachers, new institutes draw attention to this sport, by a special trainer course. We want to teach the basics of Korfball, teach participants gender

equality and cooperation, and respect for weaker and less gifted people and thus raise decent people. To improve the teachers, to develop their progress, we would like to create a Korfball Coaching Course. After the course there would be 8-8 new korfball trainers in every V4 country (32 total), who can bring experience back to his/her schools, and can show children and school, to the leaders that korfball is more than a sport, its the best way to show everyone that we could be more open-minded and empathic, and we could create good relationships in a healthy way. Also during the course we would like to show “special” korfball for handicapped people. With the new people and knowledge we would like to spread the importance of “being active for life” and “lifelong learning”, both are - in our point of view - the bases of well-being and health, in every age and every scene of life.

2.3. What added value does your project bring to the already existing practices? What is the innovative element in your proposal?

We would like to bring 2 specialists for the project from the Netherlands, the KNKV has the best experts in the world of korfball. Their basic knowledge in the aftergrowth development should be implemented into the system of each country in the V4 area, also the special, handicapped program has relevance in our plan of progression. We would like to give a special, unusual point of view with the coaching course, because korfball is unique, but to show it to someone, you need to believe in it. We want to show for the participants that we believe in the power of equality, gender equality and cooperation, and how to respect weaker and less gifted and thus raise decent people. We would like to give equipment to the teachers with a sort of enthusiasm, that everybody can do for a better future.

2.4 What is the regional relevance of your proposal?

We expect from the project to encourage people that to be healthy, to draw their attention to a healthy lifestyle, that doesn't have to be unenjoyable. Influence the children with a different point of view help for the adults too. With the program we can involve adults to the world sports, only a few of them would be "active" sportman or sportwomen, but most of them going to be parents of the children whom plays, fan, who follow up the teams, sponsors. We would like to involve the handicapped people also,

because today it's much more harder for a "breakout" for them, we would like to help them in it, and create the healthy life opportunities for them, as the part of our "being active for life" vision. We believe that the project could help people to accept the difference, in every scene of the society.

2.5. How would you describe your organization’s experience in dealing with the proposed topic? Have you previously implemented similar projects?

Our organization have a few project in the last 20 years to involve new teachers and trainers. Most of it was succesful, they had good evaluations about the courses, the programs, but the afterlife of them was not efficient enough, after a few years most of the participants dissapeared because of the low chance of emulation, low number of teams. Today, by the LTAD view we have better championship system, we have more clubs and more children, in more settlements. We have experience from before (national and international), good and bad also, so we can make much better progression right now.

3. TARGET GROUPS

Target group	Method of selection	No. of people
Teachers at primary, secondary schools (mainly P.E. teachers), Korfball trainers	Teachers interested in korfball and its further implementation in their school activities. Trainers of teams or national selections, to improve development programs. Basically P.E. teachers have been choosen with competition (applying) by the federations (of each country, 8 participants/country). The federations decide the requirements of the selection. Every participants need to speak english, because the course is in	32

Target group	Method of selection	No. of people
	english language.	
Children and youth between 10 and 15 years of age (Indirect target group)	Children involved in korfbal activities in schools or clubs after the course. Basically on the 10-15 age group has 60 pupil in a year, so its 240 children/participant.	7680

4. SPECIFIC RESULTS

Specific result	Contribution to the project's overall goal
Teach the basics of LTAD, LLL and Korfbal	Most of the teachers don't know what is the most effective way to train children in an exciting and entertaining way. Showing the key points could help the teachers to assimilate/accomodate. With this the participants get a new point of view.
Help to learn equality and cooperation among genders, teach them how to respect and accept difference between people	With the unique rules, the difference in dimension (such as height or weight, gender) dissapears. This teach the players and children to have respect for everybody else. We want to raise decent people, with that we can show equal rules, where everybody can achieve succes.

5. DISSEMINATION AND FOLLOW-UP

5.1 What activities will you carry out to share the results of the project outside your organization and partners?

The federations undertake that they follow the progress of the participants after the project, help them to develop the schools progress. The Hungarian Korfball Federation plan to create regional centers to help to build relations between schools, spread korfball in the country. We plan to hold "inside" school tournaments, and regional tournaments for institutes along the "normal" national championships. We would like to promote the program on leisure events also, such as sport festivals, teacher training programs, as a equipment to make a healthier society, in body, mind and soul.

5.2 Do you plan any activities in the future which will build on the results of this project?

We would like to organize a school korfball championship (regional school cups, international school cups ...) beside the normal national championships, to make a competition on a lower level, as a recreational level. If the students are more interested in it, they can step forward to the competition level, and even to the national selection level.

IV. DELIVERABLES

1 Education course for teachers and trainers (Event–Private), Balatonszemes, HU

01/05/2021–31/08/2021

Trainers course with attendance of 32 trainers or teachers from V4 countries. Each country may enter up to 8 participants. Event taking place in Hungary as the applicant of the project. 3 nights (4 days) course during an extended weekend (by plan). 2 foreign and 2 domestic lecturers. At the last two day there would be 4 tournaments for U15 age group between teams. Teams would take part in 4 different kind of korfball competition: normal, beach, water, and outdoor.

Direct target groups:

Children and youth between 10 and 15 years of age : 40

Selection/outreach: Children from local schools and korfball teams, selected by the Hungarian Korfball Association. The children are going to participate on a korfball camp organized by the federation. This is another project of the HKA.

Teachers at primary and secondary schools, Korfball trainers: 32

Selection/outreach: Teachers interested in korfball and its further implementation in their school activities. Trainers of teams or national selections, to improve development programs. 8/country Basically P.E. teachers have been chosen with competition (applying) by the federations (of each country, 8 participants/country). The federations decide the requirements of the selection. Every participants need to speak english, because the course is in english language.

Dissemination/promotion

After the project event, we would like to create an international school camp and tournament for the participant teachers (school teams) which takes place in different V4 countries every year. We would like to involve new schools/teachers with every program, if its possible we would like to invite teams/schools from WB and EP region either.

Role of the applicant and project partners

The preparation of the project preparation is up to the Hungarian Korfball Association. In the implementation the KNKV lecturers and other lecturers (mainly hungarians) take part, also the organizer and volunteer staff helps them. The Czech, Slovakian and the Polish partner helps for us to find the best participants in their country (8 for each nation) to spread this sport, this new view as much as possible. After the project each country have the chance to involve approximately 2000 new student into a healthy, respectful program, where they not only get sport, they get a view, how they can do it in a different way to change the world, to build a better world, start from the V4 region. After the program we plan international tournaments for the participant teachers and new teams.

Budget category	Budget subcategory	Budget description	Sum
Printing/publishing	Printing/publishing	Propagational and educational material	200.00

costs	costs		
Accommodation and Board and catering board	40 people, 8 €/day, 4 days -> 32 €/person 32 participant 4 lecturers 4 organiser and volunteer		1,280.00
Accommodation and Accommodation board	40 people, 15 €/night, 3 nights ->45 €/person 32 participant 4 lecturers 4 organiser and volunteer		1,800.00
Promotional costs	Promotional gifts with (the fund's) logo	Promotional equipemants with the funds logo, for example bottles, cap, usb memory sticks, pens...	500.00
Transportation and postage	Personal travel costs	2 cars from Wroclaw (Pol), 1020km*2=2040km 0.18€/km 367,2 €/ total	367.20
Transportation and postage	Personal travel costs	2 cars form Brno, 750km*2=1500km 0.18€/km 270€ total	270.00
Transportation and postage	Personal travel costs	2 cars form Prievidza, 580km*2=1160km 0,18€/km 208.8€ total	208.80
Transportation and postage	Personal travel costs	train for 8 participants from Budapest, 20€/adult 8*20€=160€ total	160.00
Rent and technical services	related Rental costs	Rent of a Sporthall, 8 hour/day, 3 days, 15euro/hour 3*8*15€= 360€ total	360.00
Transportation and postage	Personal travel costs	Flight ticket for the dutch lecturers 150€/person Eindhoven - Budapest - Eindhoven Travel cost from Budapest Airport to Balatonszemes and back (332km total) 332*0,18€ -> 59,76~60 360€ total	360.00
